

Remarks:

This amendment is submitted in an earnest effort to advance this case to issue without delay.

The claims have been replaced with a new set of claims carefully drafted to define the instant invention over the art. Nothing in the art shows a connection like here between the outer shielding 15 along the outer casing and also through a central ground pin. Thus here there are two ground paths, the outer one that is admittedly standard, and a center one via the ground pin 1, with the element 13 of FIG. 8 forming the connection. This is very effective for high-frequency use.

Respectfully submitted,
K.F. Ross P.C.
